

Marks of Excellence in Fence Construction

Quality remains one of the best assets a fence must have. A high quality fence will last for longer and provide higher levels of security. Some people tend to use fences made of metal in their properties. Metal fences can be robust, enduring and good to look at. However, the allure of something natural like wood can be difficult to beat. A wooden [fencing Hobart](#), seems almost natural when it encompasses an open area like a garden or a field.

Pat's Fencing (Lauderdale, Tasmania), has been providing reliable and quality fences for several years. The types of [timber fence designs](#) they provide include:

- ❖ **Paling Fences:** These fences include galvanised steel posts. The posts provide greater strength and durability.
- ❖ **Picket Fences:** These fences allow you a choice. You could get picket fences made from either treated pine or hardwood.
- ❖ **Screen Fences:** These fences provide heightened levels of privacy. Further, they do not cut down on the entry of light. This makes them perfectly suited to the modern home. Options for these type of fences include treated pine, hardwood or mod-wood (made from recycled wood and plastic milk bottles).
- ❖ **Heritage Fences:** These fences will usually be ideal in heritage homes. Pat's Fencing can construct these based on old photographs you might have.
- ❖ **Tubular Steel Fences:** These fences can be highly robust and stylish security enhancers. These fences need low levels of maintenance.
- ❖

An increased awareness of environment concerns, has led to an increase in the number of people opting for wooden fences. The benefits of opting for a wooden fence include:

- ❖ A traditional and classic look to the house
- ❖ Affordability
- ❖ A higher level of customising options in terms of painting or staining
- ❖ Environment friendly
- ❖ Easy to repair and install
- ❖ Enhanced levels of privacy
- ❖ Durability
- ❖ Versatility in options pertaining to design and style

Given the several benefits of wood as a fencing material, Pat's Fencing also sounds a word of caution. Wood could rot or warp easily in areas having high moisture levels. Insects like termites could also infest the wood and weaken it. Hence, using high quality wood remains necessary outdoors. Wood like cedar, pine and cypress provide good options for use outdoors. Regardless of the wood used, you also need a good provider of fencing solutions. By availing of Pat's Fencing solutions, you get reliable fences at an affordable cost.
